

# EDDIE NAZARIO

## Software Engineering

@ enazar14@wgu.edu [linkedin.com/in/eddie-nazario-20b2a320a](https://www.linkedin.com/in/eddie-nazario-20b2a320a) Hopewell, VA

## SUMMARY

---

Software Engineering student with hands-on experience developing full-stack applications, REST APIs, and AI-driven automation systems. Skilled in backend service design, relational and NoSQL database management, and building scalable web and mobile applications. Strong interest in system integration, workflow automation, and enterprise software development. Currently pursuing a Bachelor of Science in Software Engineering at Western Governors University.

## KEY ACHIEVEMENTS

---

### Full-Stack Application & Automation Development

My key achievements include developing an AI-powered bilingual booking automation system that integrates OpenAI, databases, messaging platforms, and email workflows to streamline scheduling for a real business. I also designed and built a Spring Boot backend application implementing REST APIs, database modeling, and layered architecture to support a vacation booking platform. Additionally, I developed an Android mobile application with relational database persistence and full CRUD functionality, demonstrating my ability to build complete, data-driven software solutions across web, backend, and mobile environments.

## EXPERIENCE

---

### AI Automation Developer

#### Pelukita's Show

07/2025 - Present Hopewell, VA

Pelukita's Show is a children's entertainment business that provides birthday party and event services, including themed performances, music, dancing, and interactive entertainment for families and community events.

- Developed bilingual AI booking assistant using GPT-based automation.
- Built backend workflows integrating OpenAI APIs, MongoDB, Facebook Messenger platform, and Gmail API.
- Implemented session tracking and multi-step booking flow to manage customer scheduling data.
- Created automated confirmation email system and input validation logic.
- Designed conversational logic supporting multi-turn user interaction.
- Reduced manual booking coordination through automation.

### Freelance React Developer

#### Andrey's ProLandscaping & Tree Services LLC

08/2023 - 01/2024 Midlothian, VA

Andrey's ProLandscaping & Tree Services LLC is a residential and commercial landscaping company that offers lawn maintenance, tree removal, property cleanup, and outdoor improvement services for clients throughout Central Virginia.

- Developed a responsive business website using React.js.
- Improved mobile performance and search engine visibility.
- Implemented user-friendly content management features.
- Worked directly with the business owner to translate workflow requirements into application features.

### Junior React Developer

#### Vet Tech IT Services LLC

02/2020 - 05/2022 Midlothian, VA

Vet Tech IT Services LLC is an information technology service provider that delivers web development, software solutions, and technical support services to small businesses and organizations.

- Contributed to front-end feature development within an Agile team environment.
- Participated in debugging, testing, and code reviews.
- Used Git-based version control for team collaboration.
- Improved user experience through responsive UI enhancements.
